Pat,

Below is the latest data from SDWIS (FY 2017, Q4) showing lead ALEs in New Jersey. The one entry is bold is suspected to be a data entry error. Can NJDEP please follow up with the system to help correct the entry?

Thank you,  
Dan

Those in bold are suspected of being data entry errors, due to the level reported and the fact the system did not have a recent history of levels that high. We will need to get back to NJ and NY to correct some of these.
